AUTHOR INDEX VOLUME 5 (1986)

The issue number is given in front of the page numbers

Anstreicher, K.M., A strengthened acceptance criterion for approximate projections in Karmarkar's algorithm (4) 211–214
Baba, Y., On the $M^X/G/1$ queue with vacation time (2) 93– 98
Banks, J., IBM® PC applications programs and supporting documentation (5) 267–268
Bartholdi, J., III and M.A. Trick, Stable matching with preferences derived from a psychological model (4) 165–169
Batson, R.G., On constrained maxima of convex functions (1) 51– 54
Bhat, U.N., *see* R. Lal (6) 305–311
Birge, J.R. and S.W. Wallace, Refining bounds for stochastic linear programs with linearly transformed independent random variables (2) 73– 77
Boxma, O.J., A queueing model of finite and infinite source interaction (5) 245–254
Boxma, O.J. and F.G. Forst, Minimizing the expected weighted number of tardy jobs in stochastic flow shops (3) 119–126
Charnes, A., W.W. Cooper and R.M. Thrall, Classifying and characterizing efficiencies and inefficiencies in data development analysis (3) 105–110
Cooper, W.W., *see* A. Charnes (3) 105–110
Craven, B.D. and V. Jeyakumar, Equivalence of a Ky Fan type minimax theorem and a Gordan type alternative theorem (2) 99–102
Csirik, J., Bin packing as a random walk: A note on Knödel's paper (3) 161–163
Csirik, J., G. Galambos, J.B.G. Frenk, A.M. Frieze and A.H.G. Rinnooy Kan, A probabilistic analysis of the next fit decreasing bin packing heuristic (5) 233–236
Cui, W.-T., *see* S. Fujishige (4) 207–209
Darveau, J.-M., *see* C. Dupuis (3) 149–155
Dubois, D., Generalized probabilistic independence and its implications for utility (5) 255–260
Dupuis, C. and J.-M. Darveau, The convergence conditions of diagonalization and projection methods for fixed demand asymmetric network equilibrium problems (3) 149–155
Eikeboom, A.M., *see* H.C. Tijms (1) 25– 32
Färe, R., A dynamic non-parametric measure of output efficiency (2) 83– 85
Feichtinger, G. and G. Sorger, Optimal oscillations in control models: How can constant demand lead to cyclical production? (6) 277–281
Fischetti, M., Worst-case analysis of an approximation scheme for the subset-sum problem (6) 283–284
Forst, F.G., *see* O.J. Boxma (3) 119–126
Fox, B.L. and P.W. Glynn, Discrete-time conversion for simulating semi-Markov processes (4) 191–196
Frenk, J.B.G., *see* J. Csirik (5) 233–236
Frieze, A.M., *see* J. Csirik (5) 233–236
Fujishige, S., A. Nakayama and W.-T. Cui, On the equivalence of the maximum balanced flow problem and the weighted minimax flow problem (4) 207–209
Galambos, G., *see* J. Csirik (5) 233–236
Gehrlein, W.V., General mathematical programming formulations for the statistical classification problem (6) 299–304
Gehrlein, W.V., On methods for generating random partial orders (6) 285–291
Gerchak, Y. and M. Henig, An inventory model with component commonality (3) 157–160
Gerchak, Y. and M. Henig, The basketball shootout: Strategy and winning probabilities (5) 241–244
Giauque, W.C., *see* J.V. Hansen (3) 137–143
Gimple, M., *see* Y. Ikura (2) 61– 65
Glynn, P.W. and D.L. Iglehart, Estimation of steady-state central moments by the regenerative method of simulation (6) 271–276
Glynn, P.W., *see* B.L. Fox (4) 191–196
Grigoriadis, M.D., B. Kalantari and C.Y. Lai, On the existence of weak greedy matching heuristics (4) 201–205
